Seweryn Bidolach - CV

PROFILE

Seweryn Bidolach**,** +44 743 789 3938**,** +48 790 815 037, Flat 22, Bowyer House, Vermont Road, London SW18 2AE, UK**,** contact@softwarelondon.net

TECHNICAL SKILLS

- Project Management (Agile, PRINCE2), Product Management, Team Building & Motivation, Risk Management, Contract Negotiation, Scrum Master, Planning and Analyzing Projects (Agile Vision and Roadmap, Product Backlog)
- Entertainment & Media, E-commerce, IT & Telecommunication, Gambling & Game Developing, Marketing
- SCRUM, XP, Iteration Planning, Stand-up Meeting, Iteration Retrospective, Test Driven Development, Business Driven Development, Kanban, Lean software development, Technical documentation, Agile Vision, Roadmap Planning, Product Backlog
- MS project, Jira (Product Backlog, Sprint Planning), Confluence, Wiki, H4P, Google drive
- Java (J2EE, EJB, Servlets, Applets, Applications, Android), JavaScript (nodeJS, JQuery, Angular, prototype), ARS Remedy, PL/SQL, PHP, C#, XML, HTML, CSS, UML
- Spring Framework, Acegi Security, Spring MVC, Spring AOP, Hibernate, JDBC, MyBatis, GEF and openCMS Framework, J2EE (RMI, CORBA, Session & Message beans, JNDI, JDBC, JMS, JFS, Swing, Web Services, REST, SOAP, Socket), REST (RESTful, Swagger, Wordnik, Spring Data REST), OpenBD, Coldfusion, Magnolia
- Eclipse, Netbeans, Spring Tool Suite, PHPStorm, WebStorm, QA(Jenkins, Sonar, Crucible, Mantis), Nexus
- Java(JUnit, TestNG, Cucumber, Selenium), JavaScript(Mocha, Karma)
- Tomcat, Jetty, ServletExec, Express, Apache, Web logic
- Oracle, MySQL, PostgreSQL, InterBase, MS SQL Server, MS ACCESS, mondoDB
- CVS, SVN, GIT
- Windows, Linux (Debian, Red Hat, Ubuntu), Android

PROFESSIONAL EXPERIENCE

1. Extreme Live Gaming, NOVOMATIC Group (Senior Java Developer) 02.2015 - until now

- Responsible for software design and developing in online live casino (back office, platform customization, system integration, backend maintenance)
- Improvement QA process (define issue workflow and priority lists) and Bug fixing
- Create live video streaming based on HTML5 and FFmpeg

Technical Environment: J2EE, JDBC, MS SQL, osCache, XML, JSON, REST API, MVC, Web Services, SOAP, Maven, JSP, TestNG, JUnit, HTML, CSS, Mantis, SVN, Web Logic, Socket, TCP, UDP

2. Seweryn Bidolach MICROSTEP (Owner)   02.2012 - 02.2015

- Project and Product management, reporting and risk management
- Responsible for technical approach of the project
- Directly contact with customers on the different business level
- Responsible for Agile rules and methodology SCRUM (Daily Team Scrum, Sprint Demonstration, Retrospective and Planning - Every second Wednesday)
- The process of SCRUM controlled by Jira Tools
- Support development in Java and NodeJS (Create vision, project structure, code development)
- Responsible for whole development project(Planning, Implementation, Create technical concept, Testing)

BeeInSocial is the online shop on social media   (3 months)
(http://www.beeinsocial.pl, Co-Founder of this Start-up)
Chief Technical Officer
- Team members about 5 people
- Remote team work

Technical Environment: nodejs, postgresql, angular, npm, jira, express, grunt, karma, bower, bootstrap, api (facebook, ebay, amazon, etsy, allegro)

Ecosynergy   (4 months)
(This project is related with renewable energy where people build prototype of engine)
Agile Project Manager, Scrum Master
- Implementation Agile rules in the organization (daily stand-up, retrospective, demo, planning, storytelling)
- Implementation part rules of the Scrum and ATERN
- Team members about 6 people
- Implementation Jira and Confluence like general tools to control agile process
- Control the whole process from planning on the high level to development on the mid-level

Booking platform and managing service in real time   (1,5 years)
(http://www.took.pl, Co-Founder of this Start-up)
Chief Technical Officer
- Projects managed in accordance with the methodology SCRUM
- The process of SCRUM controlled by Jira Tools
- Team members about 7 people

Technical Environment: J2EE, MyBatis, PostgreSQL, osCache, XML, REST API, MVC, Spring, Web Services, Maven, Jira, Modules, Wurfl, JavaScript, JQuery, SOAP, urlrewrite, ColdFusion

3. AMB software, Mondia Media Group GmbH (Contractor)   03.2011 - 10.2014
- Projects managed in accordance with the methodology SCRUM (Daily Team Scrum, Sprint Demonstration, Retrospective and Planning - Every second Wednesday)
- The process of SCRUM controlled by Jira Tools
- Daily contact with the customer (skype, email, lifesize)
- Coordinate works with improvement QA (Sonar, Crucible, Jira, Hudson)
- Project management, reporting and risk management
- Senior Java Developer on the beginning collaborate with AMB
- Responsible for design, develop, testing process and provide technical documentation.

Portal with Music and Video online streaming on the Germany market   (1,5 years)
(http://player.ampya.com)
Team Leader/Scrum Master
- Team members about 12 people
- Coordinate and support works with Ampya player and whole Ampya backend.
- Support team with many technical problem
- Create technical concept beside on UML diagrams

Technical Environment: J2EE, Hibernate, Magnolia, My SQL, osCache, XML, REST API, MVC, Spring, Web Services, Maven, Jira, Modules, Wurfl, Hudson, Wiki, JavaScript, JQuery, Prototype, SOAP

o2 Mobilefun - The online shop with entertainment content   (6 months)
(http://mobilefun.o2online.de)
Team Leader/Scrum Master
- Team members about 7-8 people
- Coordinate and support works with o2 Germany WEB/WAP portal (In the shop you can buy wallpaper, audiobooks, eBooks, rings, infotainment)
- Coordinate, support works and create architect in Customer Care Tool for support desk in o2

Technical Environment: J2EE, Hibernate, Magnolia, My SQL, osCache, XML, REST API, MVC, Spring, Web Services, Maven, Jira, Modules, Wurfl, Hudson, Wiki, JavaScript, JQuery, Prototype, SOAP

Platform Powers "Gettings" Mobile Media Network for E-Plus   (1 year)
(http://www.gettings.de)
Team Leader/Scrum Master
- Implement REST API mobile interface
- Implement iBatis mapping database files.

Technical Environment: J2EE, iBatis, ColdFusion, Open BlueDragon, MS SQL Server, osCache, XML, REST API, MVC, Spring, Web Services, Maven, Jira, Modules, MongoDB, NetBiscuits, Wurfl

4. Hertz Systems Ltd   03.2010 - 02.2011

- Responsible for design, developing, testing process and provide technical documentation.
- Developing in JAVA, PHP, HTML

HMSW – guard monitoring system   (9 months)
Senior Java Developer
- Create RCP application (eclipse plug-in) to monitoring guards in real-time.
- Create Hibernate and Web Services interface.
- Create module for remote configuration of driver devices built into the MTP.

Technical Environment: J2EE, Eclipse RCP, Hibernate, MySQL, ehcache, XML, GEF, Draw2d, MVC, SWT, Spring, Web Services

GPS system for vehicle monitoring and supervision of police services   (2 months)
Senior Java Developer
- Design database schema and RCP application (eclipse plug-in).
- Implement map module to visualization vehicles in real-time.
- Implement Hibernate and Web Services interface.

Technical Environment: J2EE, Eclipse RCP, Hibernate, MySQL, ehcache, XML, GEF, Draw2d, MVC, SWT, Spring, Web Services, MapCenter, EMF

5. Max Elektronik SA, Sygnity SA   03.2009 - 12.2009

- Responsible for design, develop, testing process and provide technical documentation.
- Developing in JAVA, PHP, HTML

JARC – System to support any business processes bound to network assets modeled in GIS technology   (3 months)
Senior Java & JavaScript Developer
- Extended jqGrid component (master-detail) and integrate it with JARC System.
- Create extensions for GIS maps.

Technical Environment: J2EE, Eclipse, ArcGis Server, RPC Janson, JavaScript, Jquery, Dojo, Prototype, Oracle, ScrumWorks, Mantis, JDBC

Ebilet - electronic ticket system   (6 months)
Senior Java Developer
- Configure Web service (WSS4J) and repair apache-cxf-2.2.1 library for communication client-server (Solutions: override WSS4J interceptors). Authorization created in configuration „Timestamp Signature Encrypt".

Technical Environment: J2EE, Eclipse, ScrumWorks, Cxf, Web Services

6. ASINIT   11.2007 - 02.2009

- Responsible for design, develop, testing process and provide technical documentation.
- Remedy developer
- Includes multisystem integration, database analysis, databases integration.
- Projects supports ITIL processes: incident, problem, change.

Interface for Change Management in BMC ITSM   (4 months)
Remedy & Java Developer
- Create workflow to control external tasks and connection this with Change Management and Task Management in BMC ITSM.
- Create additional form *General Config* to control process flow.
- Create additional fields on OOTB forms (e.g. *TMS:TASK, CHG:Infrastructure Change*).
- Configuration ARS Email Engine and utilization Email Engine to control process dataflow.
- Utilization Perl Engine to perform confirmation external tasks.

Technical Environment: Remedy, BMC CMDB, ITSM 7, ARS API, Perl, J2EE

Enterprise Integration Engine for CMDB (4 months)
Remedy & Java Developer
- Create J2EE Application to integrate data between various database servers, data sources and BMC CMDB.
- Utilize JDBC and CMDB API to integrate external source e.g. Oracle, Excel and BMC CMDB.
- Application collect external data reconcile them and create final CIs and Relationship between them.

Technical Environment: Remedy, BMC CMDB, ITSM 7, ARS API, J2EE, Oracle, XML, PL/SQL, ARS CMDB API, JDBC, Eclipse

Cramer to CMDB Interface (3 months)
Remedy & PL/SQL Developer
- Create PL/SQL interface between the BMC CMDB application and the Cramer RM Customized system with utilized O2 Cramer API.
- Solution based on various Oracle DB versions, and communication process covered by remote procedures.
- Data exchange is configured, periodical and bases on ORACLE JOB.

Technical Environment: ARS Remedy, CMDB, ITSM 7, Oracle, XLS, PL/SQL, SqlPlus

Global Equipment/Patching database (6 months)
Remedy & Java Developer
- Remedy Client and external Web-based and J2EE Application for Circuit Database Module.
- Responsible for migration to CMDB.
- Create XLS Gateway to load data from xls and csv files.
- Duties: utilize BMC CMDB for Patching DB, remedy development, integrate various databases into DB container, create XLS PD Loader, java development and supervising application modules testing

Technical Environment: ARS Remedy, Remedy Java API, CMDB, J2EE, ServletExec, Jetty, Oracle, XML-XSD, MS Access, XLS, PL/SQL, Solaris, UML

7. AMB software 01.2007 - 10.2007
- Responsible for develop, provide technical documentation and testing application's modules.
- PHP, Java Developer

Technical Environment: Java (JSP, OpenCMS, Web Service, Servlets), XML/XSL/XSLT, HTML, JavaScript, Ajax, dojo, PHP, XML, CSS, XHTML, MySQL, Interbase, Flash, Java, J2EE, XML, UML, GEF, Draw2d, MVC

EDUCATION

2009 - 2010 : Project Manager specialization, Poznan School of Banking, Poland
2003 - 2008 : M.Sc. in Computer Engineering specialization, University of Zielona Gora, Poland, thesis title: *Conrtol dataflow in methodology Cheesman-Daniels.*

CERTIFICATES & TRAININGS

- ITIL® Foundation v3
- Professional Scrum Master I
- PRINCE2TM Project Management foundation
- AQAP 2210 NATO Supplementary software quality
- Certificate of Revolutions Academic Companies
